

# 902-517 Border Timber – Straight

Durable, high-density polyethylene roto-molded construction

Strong enough to sit upon

Lightweight and versatile enough to move or change easily

18" long ½" diameter Steel spikes secure the system and anchor it into the ground (28" spikes for double stacked timbers)

Modules are hollow to insulate plants for a longer growing season or to accommodate sand or gravel for added stability

Can be stacked to 20" high

Dimensions:

Height = 10"

Width = 6"
