N-Shape Outdoor Fitness Products

Specifications:

Outdoor Fitness equipment shall be fabricated from 12 gauge steel tubing that has been treated via Cathaphoresis, an electrochemical coating process for metallic surfaces widely used in the automotive industry owing to its penetration and long lasting life. The mounting tube shall measure 6-5/8 inch O.D. with a wall thickness of .16 inch. Action arms shall measure 2 3/8 inch O.D. with a wall thickness of .13 inch and support arms shall measure 1 inch O.D. with a wall thickness of .12 inch. All units shall support 300 lbs. All articulating action shall feature the patent pending "Torsion" system, which will allow for a fluid range of motion. All stationary and moving platforms shall feature a molded plastic fitting. A flat mounting plate measuring 16 inches square with a thickness of 3/8 inch will secure each unit to the in-ground mounting plate. A plastic ring will cover the attachment plate and will be secured via 3/8 inch x 2 inch stainless steel button head bolt.

Color:

This product is available in Silver with Orange plastic accents.
