All of the DOGIPOT products offer great ways to introduce pet waste management into your park. However, one of the most important things you need to start using them is a place to put them up. The 8-Foot Polyethylene Telescopic Square Post is designed to be that place for all of your polyethylene components. The post itself is retractable and can be set to a variety of heights between 4 to 7-feet. The green color of the plastic helps the dog waste components to fade into the background as patrons enjoy the time with their pets. There are many different products that work well on this post such as the 10 Gallon Green Polyethylene Waste Receptacle, Beige Polyethylene DOGVALET, and the Green Polyethylene Junior Bag Dispenser to just name a few. Whatever you decide to put on the post, it is sure to stay in place for years to come.
