- Wonderful addition for any dog course

If you are looking for a challenge for your pet when they are playing in the park, then the BarkPark King of the Hill is the right choice as it can provide canines of all shapes, sizes and abilities with something new and exciting to do. With the King of the Hill, dogs can walk or run up the incline and descend down the other side at the pace that they want depending on their level of confidence. When walking up and down the incline and decline, the balancing and endurance capacity of the dog are also tested. The wood has been treated with CanineCoat in order to provide slip resistant traction when in contact with your dog's paws so that they don't fall off. The two mounting options means that the device is secured into the ground at all times, ensuring the safety of your pet.

Take a walk on the BarkPark Dog Walk if your pup needs to ease into the challenge.
