ASTM F1487-17

CPSC PUB #325

Ensure rules are understood and safety is maximized with the 2-Sided Playground Safety Rules and Welcome Sign. Harm to the play structure and to physical health is much more avoidable when the proper signage is used. Children and adults being informed is at the forefront of this product's design; helping to minimize risk and the improper use of the equipment. One side of the sign displays your personalized welcome message and the other, a list of rules and warnings. This sign's message can be customized to the age group of your playground. Teaching children the rules not only promotes appropriate play but also teaches them important, preventable risks that are applicable outside of the playground, too. The 2-Sided Playground Safety Rules and Welcome Sign is the perfect way to make your playground a comfortable, reliable and joyous place for anyone looking for fun.
