Custom Sail Shades

Outdoor spaces are great for playing, picnicking, and many other activities. However, use of these spaces can be limited by such things as inclement weather or the scorching midday sun. You can get more use out of your space when you install an outdoor sail shade, and at AAA State of Play, we have the durable, high-quality sail shades that you've been looking for.

Whether you need to cover a play area or outdoor seating at a café, a custom sail shade shelter will add a unique touch to the space. These outdoor sail shades will protect against sudden rainfall, harmful UV rays, and other undesirable things such as bird droppings, not to mention that custom sail shades will keep the space cooler on a hot summer day.

While an umbrella may be fine for a deck or patio, these shelters are designed to be durable for commercial use in larger areas. These affordable custom outdoor shades are available in a variety of different sizes and styles. Whether you want a traditional square design or something much more creative, we can help to make your vision a reality and protect people using your space from too much sun exposure.

But size and shape are not the only aspects of these outdoor sail shades that can be customized. You also have the choice of 12 metal different colors, including colors that can be nearly impossible to find, such as purple, fuchsia, and orange. The fabric selection is extensive as well.
