- Solid top and benches eliminate areas where dirt might gather

The 357 3-foot Preschool table by Ultra Site is the perfect solution for little ones whom a full sized table is still too big for them. Its vibrantly colored, fun design is inviting and comfortable for young children. The thoughtful design features a walk-through design so children do not have to climb over the seat to get in or out. This makes it adaptable for children who are still developing their walking and other motor skills. The short size makes it easy for toddlers and young children to comfortably sit at the table to eat, play or to take a break. Small children will feel more secure and adults won't worry about their children as they use the table. Durable polyethylene planks are bolted to a sturdy steel frame using zinc-coated hardware ensure that this table will last through years of constant use.
