SALE \$6,393.00

Age Group: 2 to 5 years

Footprint: 9' 10" long x 14' 11" wide x 11' high

Use Zone: 21' 10" x 26' 11"

The Discovery Ridge Center with Roof is a simple piece of apparatus that offers 2 decks within the structure. There is also a long slide and a vine climber that allows children to climb up the structure and onto the top deck. This is a great way of improving fine motor and gross motor development, as well as helping children learn to share, by allowing other children to use the same equipment at the same time. There is also a mathematic board, known as TouchMath. This helps children learn whilst they are playing outside, which is a great addition to the outdoor learning and playing apparatus. Children love imaginative play, and the jungle theme of this apparatus helps the children engage in dramatic, imaginative play with every visit.
