### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

### ADA Compliant

The Over the Top Play Structure is bursting with activities. Kids who fancy climbing and sliding will find a home on this structure. With structures aplenty and three different slides to try, there is no wonder this unit is called Over the Top. Almost every child will be able to find something to enjoy. The Straight Slide is only 3-feet off of the ground which is a perfect fit for kids who do not like heights. The colorful Inclined Covered Bones Bridge connects the lower level to the upper decks. Above, two tall Wave Slides glide to the ground; enticing the bolder children to test their bravery. Sliding isn't the only fun, an Overhead Straight Trapezoid Loop Ladder crosses above for kids who prefer to swing across rather than riding and gliding. Those willing to prove their upper body prowess can give the Pull Up Bars a whirl. The Over the Top Play Structure is unlike any other.
