

Recycled Plastic Creekside Bench

MSRP \$638.00

SALE \$561.00

Highlights:

- Made with four recycled plastic slats
- In-ground or surface mount available
- Can be placed against walls or buildings
- Bull-nosed slats on the front and back for comfort

The Recycled Plastic Creekside Bench by Frog Furnishings provides a comfortable place for patrons to sit at your park or playground, taking a break from walking or playing on nice days. It is durable and easy to clean, making it very low maintenance for busy people, or places that see large volumes of people. The bench is made from four 3-inch x 4-inch Resinwood slats and has black heavy duty, powder-coated steel frames. The seat comes in brown, cedar, gray, or green colors. Since the bench is backless it can be placed anywhere and used from both sides. Its front and back slats are bull-nosed (rounded) to add for comfort. Heavy duty, zinc coated hardware comes with the bench, but stainless steel hardware is available. The bench comes with surface wedge anchors for mounting. The hole diameter for the surface mount frame is 1-1/2-inch.
