- Designed to handle daily wear and various weather conditions

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Open up your playground to more than just those that can step over the boundaries with the Full Length ParKurb Wheelchair Ramp. The Full Length ParKurb ramp works well with our ParKurb Borders providing a natural entry and exit point between the 8 or 12-inch high borders. While it is obvious that the ramp makes your playground more accessible for wheelchairs, it also works to let mothers with strollers into the play area. Sometimes a mother would like to play with her child but doesn't wish to leave her stroller unattended. With the ramp, it is easy for a mother push her stroller into the area to keep it nearby. More importantly, it allows mom to bring the stroller for a quick scoop up and run if a child becomes unruly. If you are planning to add one to your play area, be sure to order our matching End Caps to create a safe transition from border to ramp.
