ASTM F1487-17

CPSC PUB #325

### ADA Compliant

Bring the adventure from out of the wardrobe onto the playground with the Cruisin' the Caspian Play System. Styled to hold adventures worthy of the original voyage without the fear of the edge of the world. Elementary school children will be delighted with four immediate access points that all require different intensities of climbing. The Transfer Station allows for everyone that wants to play a chance to play making this structure ADA compliant. The Arched Snake Climber provides children with a slight slope as they climb up the ladder. The arch-shape helps gravity to work with the climber especially as they near the structure. The Spiral Climber provides a completely vertical approach for a quick ascension. For those that are ready for a real challenge, the Overhead Straight Snake Ladder forces children to work against the full effects of gravity and their own body weight which is even more rewarding for them when they reach the main structure. For those that just want to hang out, the Overhead Straight Swinging Rings are a playground classic that any child will be mesmerized by. As kids land on the structure they will be presented with tubes and slides galore for to explore. Choose colors to bring out the adventure when picking any of our custom colors. Set sail for the edge of the planet on the Cruisin' the Caspian Play System.
