

Frog Furnishings In-Ground J-Bolts (set of 4)

MSRP \$32.00

SALE \$28.00

Highlights:

- Allows in-ground mount of recycled plastic bases
- Ideal to use with concrete for permanent application
- Angle bolts lock into concrete securing table or bench
- 4 bolts included, enough for most benches and tables

With the Frog Furnishings In-Ground J-Bolts, you can transfer your bench, chair or table from a solid concrete sidewalk or patio area to the grassy, tree-filled fields. These bolts are easy to use and incredibly effective. This mounting kit comes with four J-bolts, enough for every leg of your site amenity, and thanks to the "J" shape, securing these bolts in the ground simply requires you to attach the straight end to the leg of the amenity and the "J" in the concrete or dirt. That "J" angle will do all the work keeping your tables, chairs and benches right where you want them. This product works ideally with any Jayhawk Plastics recycled plastic items available here. The Frog Furnishings In-Ground J-Bolts will help to provide a peace of mind that your equipment will stay mounted, all with an absolute minimum of effort.
