- Product includes a single mount

Trash receptacles may be heavy, but there's always a risk of them tipping over, whether because of the wind or the mischief of park visitors. With the Frog Furnishings Trash Receptacle In-Ground T Post, you no longer need to worry about that risk. This in-ground mount allows you to sturdily place your Frog Furnishings Plastics round trash receptacles in the grass or dirt and to be sure it is going to stay there. Like their trash receptacles, the T-Mount is also made with tough, resilient recycled plastic. When mounted, the trash can will hover a little over the ground, and once it's in place, it requires absolutely no maintenance. It's as simple as installing and walking away, confident your trash receptacle will be there to gather all your litter for years to come. The Frog Furnishings Trash Receptacle In-Ground T Post is an easy way to be sure your trash receptacles are not moved.
