Spin and skip your way to improved agility with the Aluminum Balance Beam. The Aluminum Balance Beam is ideal for helping children to develop their balance, coordination, and gross motor skills. It works as a physical fitness trainer upon which children can walk, twirl, and stick the perfect landing. Its low height makes it a safe way to explore acrobatics and basic gymnastics moves. Part of our Signature Playground Fitness Collection, this attractive model is available in the powder-coat painted finish or galvanized steel. Choose from a host of bright hues for the base -- blue, purple, white, green, red, black, silver, yellow, orange, or tan -- to match your existing playground equipment and add a pop of color. With its ribbed surface and contoured sides, the Balance Beam offers a safe and durable place for balance tests.
