The Frog Furnishings Round Top Load Rain Bonnet Lid provides you with an attractive way to ensure your Frog Furnishings round trash receptacle functions to its full potential. While you may not often think about a trash receptacle working effectively, there's a significant difference between one that has a quality lid and one that goes without. With a lid, you can be sure all the trash you've thrown in stays in, including those plastic and paper bags that like to fly out and land somewhere on the grass or the playground equipment in your park or schoolyard. At the same time, a lidless trash receptacle is left to the mercy of the elements. Rain and snow make the trash soggy, heavy, and stinky. The Frog Furnishings Round Top Load Rain Bonnet Lid removes all these problems by placing a tight top on all your trash. While it remains easy to throw trash away, it makes it hard for trash to get back out or precipitation to get in. Made of durable recycled plastic, this lid will stand up well to the outdoors and remain in place for years.

If you have a square Frog Furnishings trash receptacle, you can also get a lid for it with the Frog Furnishings Square Top Load Rain Bonnet Lid.
