Use Zone: 13' x 15'

The Easy Rider Bronco is a classic playground spring rider with an adorable pony shape. The pony is made from a lightweight but sturdy aluminum with a highly detailed molding. The 'Bronco' model features a light tan coat just like that of a real Kentucky Saddle horse. However, this color is actually a coat of weather resistant powder paint, baked on at a high temperature for maximum adhesion. The horse is mounted on an extremely sturdy spring, which is built to withstand rigorous use while still allowing plenty of movement. It also comes equipped with hand holds and foot rests, so that children can hang on tight and not get thrown off no matter how hard the Bronco bucks. Plus, the aluminum components come with a lifetime guaranteed warranty, so you won't ever have to put this horse out to pasture.
