

Rubberific Recycled Rubber Mat

MSRP \$150.00

SALE \$86.00

The Rubberific Recycled Rubber Mat from the International Mulch Company is manufactured to meet the strict standards of all of our customers needs from park departments to public school playgrounds. The 100% recycled rubber mat is manufactured with a polyurethane binder that keeps all the rubber glued together for years of use. Colorant is added to enhance the mat and help it stand out on your playground. The value from purchasing a mat comes from the reduction of maintenance required and added safety under swings and at slide exits. Generally, the displacement of loose fill surfaces under swings and slides can create dangerous areas with little to no surfacing. However, with a Rubberific Recycled Rubber Mat these dangerous areas can be reduced. Each mat is 32-inches wide by 54-inches long by 2-inches thick with a beveled edge.
