

Rubberific Recycled Rubber Mat

MSRP \$150.00

SALE \$86.00

The Rubberific Recycled Rubber Mat from the International Mulch Company is manufactured to meet the strict standards of all of our customers' needs, from park departments to public school playgrounds. The main purpose of these Rubberific mats is to be placed underneath swings and slides at playgrounds in order to improve safety and reduce maintenance needs. They are designed to keep loose-fill mulch from being displaced by children's play, as these mats are designed to stay in place. Each of these Rubberific mats is 32 inches wide by 54 inches long by 2 inches thick with a beveled edge, and they weigh 80 pounds. The 100% recycled rubber mat is manufactured using EPA-approved materials with a polyurethane binder that keeps all of the rubber glued together for years of use. Colorant is added to enhance the mat and help it stand out on your playground. Color options include Classic Black, Earthtone, Forest Green, and Redwood. Order yours today for a safer playground!
