SALE \$59.00

Highlights:

- Rounded top of the curb is safe to use on any age playground
- Engineered drainage ports is resistant to pooling water
- Available in 3 colors and 3 sizes
- Pliable rubber allows the forming of curved edges

Rubberific rubber playground timbers are a great choice for containing your playground mulch and increasing the aesthetic appeal of your play area. They're made in the United States entirely from recycled rubber, so they're also an eco-friendly choice. You can choose from a variety of colors, including red, brown, and black.

Each Rubberific Recycled Rubber Timber is 7 feet 8 inches long, a length longer than most playground borders, and weighs around 40 pounds. The timber is available as either 4 or 6 inches wide and 4, 6, or 8 inches high. A polyurethane binder with added colorant of your choice makes the 100% recycled rubber content strong for use in landscaping and commercial playground environments. They are resistant to wear and tear and can withstand the elements for years to come, and their rounded tops add extra safety, minimizing the risk of playground injuries.

These Rubberific playground timbers are easy to install, cut, and shape to your specific needs. Drill holes are not included, as anchors may be needed at various points depending on use, such as at a bend or just before a cut is needed. Three 14-inch long rebar stakes are included with each timber. The innovative design of each rubber playground timber also includes specially designed drainage ports that effectively channel water away, preventing the pooling of water and potential damage to the surrounding area.

At AAA State of Play, we make it easy to order Rubberific timbers and get just the right products for your playground.
