The Animal Bouncer is a brand new variation on the classic four-seat spring bouncer. This structure is segmented into four sections styled as a Dog, a Bear, a Cat, and a Frog. Younger children can have fun on the springs while using the animal faces to practice early recognition skills. Additionally, each seat operates with its own independent spring, allowing every child to play at their own comfort level. The way children sit, facing one another on this structure also promotes social growth. This set included in-ground stakes for permanent installation.
