Use Zone: 15' x 17' 8"

Children will love arriving on the scene in their 911 Rescue Truck. Designed to look like a first response unit truck, this fun unit will foster their imaginations as they play. Four springs give the truck a lot of bounce while children play. Choose between a surface mount unit and an inground mount unit. The red frame is bright and will draw children in to play. White panels with red accents cover parts of the truck to create the look of a real rescue truck. Four wheels add to the realistic look of the unit. Two steering wheels really turn and let kids feel like they are driving. The 911 Rescue Truck requires no assembly and is designed for children ages 2-5 years old. Choose between a wood floor and a trex floor with in-ground stakes for permanent mounting at no additional cost. A trex floor is a combination of wood and plastic.
