**Fall Height:** 66"

**Use Zone:** 33' 4" x 28' 3"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

### ADA Compliant

Sparkle and amaze toddlers to elementary school children with Darby's Dazzler Play System. When running up to the playground, children will be drawn to the Spiral Slide. Sending kids whirling a full 360°, children will ride it again and again. Before they can go down the slide, they'll first need to get up to it. Children can choose any of the four routes up to the higher levels: Sea Creature Climber, Inverted Arch Ladder, Pebble Climber With Rail or Transfer Station. The Sea Creature Climber is a gentle way to reach the upper tiers. Its rotationally molded plastic arch adds full support under each foot making kids find their way to the top easily. For a bit more challenge, beginners might push themselves to try the Inverted Arch Ladder which takes away a degree of support while requiring more balance. The Pebble Climber with Rail provides handholds the entire way up while requiring children to balance on each pebble. A Transfer Station on the opposite side of the structure is yet another way for kids to get to the upper decks. The upper levels lead to a Straight Slide in addition to the already mentioned Spiral Slide. Add a bit of punch to your system with any of our custom colors.
