COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

The Pelican Pier Play Structure will send fun soaring to new heights. This unit may be compact but it is exploding with enjoyable activities. A Straight Slide and a Left Turn Slide are the prominent features of the system. Each slide branches off of each deck in different directions; adding options to the way kids play. A Figure Climber and a Vertical Ladder lead the way to the slides and provide a convenient way to explore. The mounted Ship's Wheel makes for an interesting add-on that will bring some imaginative story-building into play time. The Pelican Pier Play Structure is designed to withstand varying degrees of use. The rotationally molded plastic and powder-coat painted galvanized steel make for a hardy and firm piece of playground equipment. This unit's less intimidating layout does wonders for more timid and younger users; giving them a chance to test their courage through play.
