Fall Height: 96"

Use Zone: 32' x 56' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

The main goal behind the Peak Endurance Fitness System is to keep kids exercising while playing. The activities featured on this unit interconnect like a fun spider web. Getting to the Saddle Slide from the Curved PE Panel Climber couldn't be easier, just take the horizontal ladder and Pebble Bridge. A Standing Orbital Spinner and the Curved PE Panel Climber flank the overhead swinging rung ladder. Traveling across the rungs of the Arched Overhead Swinging Ring Ladder to the Combination Manhole Rope Climber will quickly become a child's favorite activity; testing arm strength, coordination and balance while playing. Three vertical rope climbers align to create a triangle that keeps kids close enough to interact while remaining a safe distance apart. At the end of the unit, kids will find a Saddle Slide for a banister style ride down that unconsciously works their core and relies on their balance. The Peak Endurance Fitness System will turn playtime into an opportunity to get in peak shape.
