**Use Zone:** No use zone required.

Musical learning is an important part of a child's development. The Freestanding Piano Keyboard brings the sounds of a piano to the playground. Children love pressing piano keys and hearing the sounds that are emitted. This panel may not have individual keys, but it does have eight buttons that children can press to create sounds. Each button plays a different note. Children can use these buttons to create their own songs! The detailed piano keyboard and music notes add to the look of the panel. The Freestanding Piano Keyboard is designed for children ages 2-12 years.
