Use Zone: No use zone required.

Drum sets are always fun for children! They love the sounds that drums make and when they get to make the sounds, it is even better. With the Freestanding Drums Panel, children can create sounds on drums without the expense of a drum set. With eight buttons representing eight different parts of a drum set, kids can press one and a time to hear what sound that instrument makes. They can also press multiple buttons at once to create their own drum solo. Each of the eight buttons has a drawing of the instrument it represents. Music notes decorate the top and bottom of the panel. The Freestanding Drums Panel is designed for ages 2-12 years.
