- Steering wheel turns

**Age Group:** 2 to 12 years

**Footprint:** 3' 3" x 3' 1/2" x 4' 2"

**Use Zone:** No use zone required.

From an early age, children are fascinated by cars. From the toy cars and trucks they play with to the cars they ride in, kids love everything. The Freestanding Driving Panel allows them to explore driving and how different parts of a car work. From the detailed dashboard and windows to the turning steering wheel, kids will love driving off to wherever their imaginations take them. Four interactive buttons allow kids to experience the sounds of driving. One button turns the car on while another honks the horn. On the other side of the dashboard one button acts as a turn signal and the other as windshield wipers. The Freestanding Driving Panel is designed for ages 2-12.
