Use Zone: No use zone required.

Playing on the playground is about more than just swinging, sliding, and climbing. It is important that children can enrich their minds as well. The Freestanding Twist Panel lets kids spin the center piece and watch as little balls fall from one end to the other. The twisting pattern makes it a game to get all of the balls to one side! Children learn about cause and effect as their spinning motions cause the balls to move back and forth. The Freestanding Twist Panel is designed for children ages 2-12 years old.
