

Round Heavy-Duty Recycled Plastic Receptacle

MSRP \$702.00

SALE \$618.00

Highlights:

- Liner not included in purchase
- Pleasantly round shape that lacks corners
- Plastic top opening that is easy to maintain
- Uses recycled plastic planks that make it environmentally friendly

Add a bit of rustic charm to your park, zoo, or other outdoor venue with the Round Heavy-Duty Recycled Plastic Receptacle. The planks that line and create the receptacle shape are made from a special type of recycled plastic; Resinwood. Resinwood is Frog Furnishings' special blend that creates a solid, durable, color-intense plank. The pigmentation all through the piece is what lends it a high level of scratch camouflage. When the plank is scratched, the through and through coloration will hide it. The receptacle is additionally made up of round plastic pieces that create the surface around the trash entrance. These are made from an easy clean plastic that is just a wipe away from being clean again.
