

Frog Furnishings Surface Elite Bolt

MSRP \$62.00

SALE \$54.00

Highlights:

- Works with any Jayhawk Elite Series recycled plastic base
- Allows securing to most concrete surfaces
- Includes drill bits for plastic base and concrete
- Also includes four bolts to secure the furniture to concrete

The Frog Furnishings Surface Elite Bolt allows you to secure your Frog Furnishings recycled plastic furniture that features the Elite Series base to a concrete surface. For your convenience, you will find all the necessary hardware in this kit, making the installation process easier for you. That includes four bolts (one for each leg) and two drill bits. The first drill bit is for the recycled plastic base and the second is for the concrete itself. With these specialized tools, you'll find the surface mounting process particularly easy and straightforward. Once you have the kit in hand, you can transfer your Frog Furnishings furniture and bolt it down so it is always available on your concrete surface and sure to stay where it is, stable, strong and durable.

If you'd rather use an in-ground mount to keep your tables, chairs and benches in the grass or dirt, consider the Frog Furnishings In-Ground J-Bolts (set of 4).
