

ADA Accessible Rolled Octagon Portable Table

MSRP \$1,575.00

SALE \$1,339.00

Highlights:

- Portability lets you adjust location due to changing conditions
- Tabletop overhang permits easy wheelchair accessibility
- Long lasting and vibrant polyethylene and powder coat color choices
- Rolled edges of bench seats are comfortable against legs

Update your outdoor seating area and transform it into a place for fun friendship that everyone can enjoy with the ADA Accessible Rolled Octagon Portable Table by Webcoat. This charming piece makes an ideal addition to your business, park, or school as it facilitates collective socializing by people of all abilities. The 57-inch long tabletop features an extended overhang for ADA accessibility as that seatless spot allows for a wheelchair user to park right against and under the furniture to comfortably join sitting users in dining or recreation. This commercial-grade unit features unparalleled durability with a textured polyethylene coating on the table and seats and powder coat paint on the frame; applications that are both vibrant and weather resistant. The rolled design of the seat edges creates a modern look while also providing curved edges that rest pleasingly against a pair of legs. The frame is constructed of tough 1-5/8-inch round metal posts that will easily handle years of regular use. The ADA Accessible Rolled Octagon Portable table also has pre-drilled holes in the frame base should you need to later surface mount the unit (mounting hardware not included). And the furniture features a standard size umbrella port in the tabletop to let you add some comforting shade to your location.
