

ADA Accessible Innovated Octagon Portable Table

MSRP \$1,675.00

SALE \$1,424.00

Highlights:

- Open space permits easy wheelchair accessibility
- Perforated table top that is low-maintenance
- Has a hole to place an umbrella
- Distinct tabletop corners ease entry and exit from seats

Webcoat's ADA Accessible Innovated Octagon Portable Table is available with three attached bench seats and an open spot on the fourth side that provides ADA accessibility. The unique octagonal tabletop design is enhanced with innovative steel surfacing accented with perforations to create a great new take on a dining and recreation furniture staple. This table has 46-inches of surface area to give plenty of space for those gathering to arrange a sizable amount of food or party supplies. The table surface also has a standard sized port for the placement of a shade umbrella. The perforated surfacing of the tabletop and seats permits cooling airflow that adds to user comfort on hot days and accelerates furniture drying after exposure to rain. This sturdy portable model is easy to clean and the frame also comes with pre-drilled holes for later surface mounting (mounting hardware not included). The colors of the unit's textured polyethylene tabletop and seats and its powder-coated frame are customizable. Just call or email to learn about currently available options and discuss scheduling.
