

## ADA Accessible Perforated Rectangular Portable Table

**MSRP \$1,735.00**

**SALE \$1,475.00**

### Highlights:

- Elongated tabletop provides room for wheelchair access
- Attached seating enhances portability
- UV-resistant polyethylene coat protects the tabletop and seats
- 2-3/8-inch frame creates a lightweight and strong base

This ADA Accessible Perforated Rectangular Portable Table by Webcoat features a rolled edge, perforated design to create a lightweight and mobile table. The surfaces of the tabletop and seats are covered in a textured polyethylene coat to promote exceptional fade resistance. The 2-3/8-inch powder-coated frame supports the perforated, rolled edge tabletop and seats, providing a sturdy base to those sitting on it. Both finishes come in a variety of colors you can choose from to customize the unit. You can also choose between a double or single overhang option depending on the amount of accessibility your area will require. The single overhang allows one person's wheelchair to rest comfortably at the table while the Double overhang provides two accessible places on both ends of the table. This table is portable, allowing for more versatility when it comes to placement in your outdoor area, but you can also mount them with surface mount clamps (sold separately) if you would like a more permanent option.
