MSRP \$1,236.00

SALE \$1,051.00

Highlights:

- Choose a color finish that's right for you
- Rounded corners are visually appealing and help prevent injuries
- Multiple lengths available
- Portability lets you reposition seating to suit changing spaces

The Regal Rectangular Portable Table by Webcoat is a commercial-grade furniture unit suitable for indoor and outdoor locations. Its long rectangular shape is available in a wide variety of sizes ranging from 4-feet to 10-feet in length. You'll have no problem finding one (or more) that suits your location's capacity needs. The tough 2 and 3/8-inch metal frame can easily handle regular usage by occupants of all shapes and sizes, meaning you'll get years out of your investment. The rounded corners to the tabletop and backless benches help reduce the odds of injury from accidental falls or bumps in addition to beautifying the design. The expanded metal surfaces permit air to flow through the furniture in order to cool down sitters on warm days and speed up its drying cycle. Nobody wants to sit down on wet outdoor furniture and this feature minimizes the frequency of that maintenance. If you'd prefer colors other than what's shown here, please speak to a salesperson about what other options are available. Both the powder-coated frame and the textured polyethylene seats and tabletop are available in a variety of hues. In-ground and surface mounting equipment is available to purchase separately.
