- Suitable for grassy or concrete ground
- Can also be surface mounted (hardware not included)
- Expanded metal permits cooling airflow

Webcoat's attention to detail shines through in this Rolled Rectangular Portable Table. It features edges that are rolled for a cool new look that also creates a comfortable place for legs to rest upon. This seating option is available in both a 6-foot and 8-foot option, both with attached seats in matching lengths. The bold design of the metal shaping looks great all on its own, but you can increase the wow factor by choosing from one of many textured polyethylene colors. This application is designed to inhibit colors from fading due to repetitive sun exposure. This finish, along with the powder coat painting on the frame, helps to keep the furniture looking brand new, even after heavy use. This table permits multiple people to sit while still providing plenty of leg-room underneath to allow for comfortable and enjoyable gatherings. Pre-drilled holes at the base of the framework also allow this unit to be surface mounted (surface mounting hardware sold separately).
