- Durable, eye-catching colors
- 3 and 4-seat options to fit your seating needs
- 3 seat option available with in-ground mount only
- Hearty construction that will stand firm for years

Webcoat's Regal Round WEB Table features a durable framework built of strong 2-3/8-inch metal shaped into a modern design of gently curved arcs. This powder-coated frame supports backless seats and a tabletop made of diamond-shaped expanded metal that is finished with a textured polyethylene coating. Both finishes are tough and resistant to the dimming effects of harsh weather. Cooling air flows through the diamond lattice to help keep guests cool and comfortable as well as reduce maintenance time. Your furniture will be accessible much quicker after rain thanks to this feature! The roundness of the table opens up the number of potential installation spots. This commercial-grade outdoor furniture would fit well in a schoolyard, office break area, zoo, or shopping center. Please note, mounting options vary based on the number of seats selected. The four-seat option is available with an in-ground mount or a combination surface/portable mount while the three-seat option only comes with an in-ground mount. The colors can be matched to your space's design needs. Call or email a salesperson to learn more about the current range of hue choices.
