

Modern Standard Style Park Bench With Back

MSRP \$1,173.00

SALE \$998.00

Highlights:

- Classic design using handsome expanded metal
- Curved shape ensures comfortable seating
- Made of durable material that can withstand warping
- Available as portable/surface or in-ground mounting options

Webcoat's Modern Standard Style Park Bench With Back is a comfortable seating solution that employs a contemporary design that will allow it to fit in with any urban setting. The curved bench has two armrests that will add to a user's relaxation. This commercial-grade bench is available in four and six-foot lengths. The frame is constructed from durable 2-3/8-inch heavy-duty steel that will resist sagging even after regular use by occupants of all shapes and sizes over the years. The frames are finished with a powder coat paint application and the seat is covered in a layer of textured polyethylene. This helps to protect the metal from rusting, chipping, or fading after long-term exposure to the sun. Both the seat and the frame can be bought in a wide range of color options to allow you to customize the unit to match your exact needs. Benches are available in either a combination portable/surface mount or in-ground mounting version.
