- Multiple color finishes available to personalize the unit

Webcoat's Regal Square Pedestal Table is a heavy-duty commercial-grade outdoor furniture unit that would work well in a zoo, town square, shopping center, or office park. The powder-coated frame is built of durable 4-inch square metal pedestals that are more than capable of handling years of habitual use. The metal of the seats and 46-inch square tabletop is decorated with a diamond-shaped lattice design that is protected in a textured polyethylene coat. Both finishes help keep the unit's colors dazzlingly vibrant and attractive in the face of snow, wind, rain, and sun. This furniture is available in a 3 and 4 seat version and can be bought as a portable unit or you can secure it to the ground with a surface or in-ground mount. The center of the table surface features a standard sized umbrella port, in case you would like to add some shade to your recreation space. If you would prefer colors other than what is shown here, please speak to a AAA State of Play salesperson about what options are currently available.
