- Easy to install on Webcoat products
- Prevents people from sleeping on the tables or benches
- Protects table from warping or distortion due to people sleeping on it
- Finished with a powder coat paint

This Sleep Inhibitor for Bench or Table Seats by Webcoat is an add-on purchase for Webcoat tables and benches that protects your investment when you are not available to do so yourself. This item ensures that your picnic tables and benches will not be slept or rested on so that the table can be used properly. This small and slim device is constructed from sturdy, strong steel, and breaks up the lines of your seats and benches to ensure that they are not comfortable choices for sleeping. Each sleep inhibitor weighs only one-pound, and bolts on with two bolts. It is small enough that it can be left on during the day as a seat separator or it can be easily removed for greater comfort. This seat and bench sleep inhibitor can be powder coated in your choice of colors to match your tables and seats. Keep unwanted persons off of your items and purchase a sleep inhibitor with your table.
