MSRP ~~\$587.00~~

SALE \$494.00

Highlights:

- Fits multiple bicycles
- Bicycles can be placed on either side
- Offered in either portable or surface mount
- Easy to fit a bike lock at all entrance points

Some locations will require lots of space for many bicycles which is when the Double Entry Bicycle Rack comes in handy. The rack is designed to hold bicycles on either side allowing the number of bicycles to double. Depending upon where the rack is used, it might take quite a bit of use and abuse. The rack is built from galvanized steel to withstand some of the daily use that it might endure. The rack comes in a variety of lengths; 5-feet, 10-feet and even 20-feet. Use one, two or multiple racks to create ample space for bicycle parking. If you need to mix up the parking type, a single entry version is available as well. The two bicycle racks share their aesthetics making it simple to mix the two types of racks to expand the available bicycle parking.
