- Multiple plastic slide sections that can be different colors

**Age Group:** 2 to 12 years

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Send riders in a full 360° with the 10-feet Deck Height Spiral Tube Slide - Slide and Supports Only. At this height, it allows for a complete cycle to be completed before reaching the bottom. The tight spiral allows for the extra height without sacrificing valuable horizontal space, while injecting a bit of a thrill into the ride. Hardy and commercial grade, this tube slide can be placed indoors or outdoors. That makes it particularly versatile as it can be used in public or private spaces making it a sturdy choice for residential owners as well. Powder coat painted galvanized steel posts are weather resistant as well as being an additional point to inject color into your design. The tube slide comes in sections and each portion can be colored or ordered clear to create a unique piece that can be one of a larger structure or focal point on its own.
