**Age Group:** 2 to 12 years

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Spin your riders right around with the 12-feet Deck Height Spiral Tube Slide - Slide and Supports Only. This slide will take occupants on a trip that shoots them out 90° off of their starting point making it a perfect corner slide with a centralized landing spot. As a component, this is a slide that is made to fit its surroundings. Suddenly, an indoor playground, organization building, museum or even a private residence holds much more potential. Designed as a commercial grade slide, it can withstand the same amount of traffic that a crowded park would get during peak hours. That means all of its parts are formed from industry standard materials; rotationally molded plastic and galvanized steel posts. The plastic is available in large number of colors that can be mixed and matched with the option to add clear portions to the slide as well. The steel support posts are powder coat painted for extra durability and use the similar tones to the available plastics.
