ASTM F1487-17

CPSC PUB #325

Taking the twist all the way around, the 15-feet Deck Height Spiral Tube Slide - Slide and Supports Only is a beast of a ride. The incredible height of this structure is one of only two slides in our entire line with this additional spiral. Even with the extra turn, the structure is more than strong enough to handle the force of children rocketing down its length. Built from industry standard galvanized steel with additional powder coat paint and rotationally molded plastic, it meets ASTM Standards making it a commercial grade piece of equipment. It can be used by the public or privately as would be the case with a private organization or residence. Each slide is made up of your choice of colors including the option for plastic slide sections to give riders a peek at the world below as they shoot through the tube to their next destination.
