ASTM F1487-17

CPSC PUB #325

Our largest slide, the 16-feet Deck Height Spiral Tube Slide - Slide and Supports Only, is sure to be a crowd pleaser wherever it is used. The commercial grade slide can be added in a large variety of buildings making it an excellent choice for indoor use, with it still being strong enough to handle the harsh outdoors. Additionally, the slide can comfortably find a home as either a public or private piece of equipment. It could be that cool exit route from a upper floor to one two floors below or just another piece in a larger structure. Safety is no question with its powder coat painted galvanized steel posts and rotationally molded plastic sections. It will handle years of sliding fun to come, making your choice of colors something worth spending time thinking about. All of our powder coat paint colors are designed to match the tones in our rotationally molded plastic making it much easier to make an awesome structure. But if you're not sure what color plastic you'd like, you can always just make the slide clear.
