- Helps to section your classroom into clear learning areas

Assembled Dimensions: 30" High x 6' Long

When you work in a classroom environment you know sometimes the only way to quiet things down for individual work time is by separating children with dividers. This puts them in their own little space and helps their concentration by focusing their attention on the work at hand. The Angeles Sound Sponge 30" High x 6' Long Quiet Divider is designed to help divide up classroom space. The dividers are incredibly sound absorbent! They are also flexible and lightweight, making them easy to move and change configurations. Magnetic connectors easily join panels together, so you really can create the space you need. The Angeles Sound Sponge 30" High x 6' Long Quiet Divider is easy to clean with a standard carpet cleaner and rolls up tightly with a security strap for compact storage. Two support feet made from super poly-carbonate covered steel are included to keep your divider in place. Glides are included for easy movement along the bottom edge.
