**Assembled Dimensions:** 28" high x 2-1/2" wide

By now you know that your Angeles Sound Sponge Quiet Divider has magnetic connectors to easily join panels together. Though the support feet make it easier to line your divider up against the wall, it can still have some trouble staying there, especially if the divider gets run into sometimes. With the Angeles Quiet Divider Magnetic Wall Strip, you can easily attach any size Sound Sponge Quiet Divider to the wall magnetically. The wall strip attaches easily to the wall, making strip ready to use in a matter of minutes. Included with the Angeles Quiet Divider Magnetic Wall Strip are two mounting screws and two anchors. These items will assist you in securing the strip to the wall. You will also have the freedom to arrange your dividers in different ways when using the magnetic wall strip. When you choose not to use the strip, it still takes up no additional room as it is on the wall.
