

Square Picnic Table

Price \$1,397.00

Highlights:

- Support for each corner of the table
- Four benches around the central table
- Made out of steel for strength and durability
- Thermoplastic coating to make it UV and weather resistant

Seating is almost always a consideration when creating an outdoor venue. Whether its a park, a ball field, a restaurant, or even a water park, having a place for people to sit is important. The Square Picnic Table is designed to offer a comfortable seat that will hold up through the daily wear from use and weather. The perforated steel seats and tabletop allow liquids to find their way off of the surface protecting the table from corrosive properties of sitting liquids. The frame itself is constructed out of 1- $\frac{5}{8}$ -inch O.D. steel pipes. The frame design has paired up support posts at every corner doubling the support. Each seat is doubly supported by the end of the central support posts. The tabletop and seats are covered in a thermoplastic coating that raises its resistances to UV and weather for a table to that will last for years.
