If you are looking for a small unit for young children, the Tree House Fun Slide is a great option. The compact design packs a lot of fun in to a small space, making the unit a great choice for small spaces or adding to an existing playground. Children can climb up the ladder to a platform that has barriers on the sides to help prevent falls. The platform is spacious and makes a great gathering place in the "tree house." A slide provides a quick but gentle ride back to the ground. A crawl tube is located underneath the platform and makes a great hiding place! This unit is easy to assemble and can be in-ground or surface mounted. Up to eight children can enjoy playing at one time, developing new friendships and working on social skills. The Tree House Fun Slide is for use by children ages 2 to 5 years old. Now 18" Ground Stakes are included with the price of the Tree House Fun Slide!
