Sometimes pedaling a tricycle with friends can feel like a race! The Daytona Square Pedal Path allows children to pedal around on an even, flat surface while still having fun racing their friends. The easy to install path is available with or without road stripes. Combine the path with any number of accessories or other play elements and create a unique play area on the playground that is just for tricycles. By separating this area from other areas on the playground, injuries can easily be prevented. Children will not have to worry about other elements getting in the way of pedaling, especially children who are still learning how to ride a tricycle. The Daytona Square Pedal Path comes with a special section for entering and exiting the path, easily guiding the trikes before and after play time. The pedal path will also make supervising play easier as the trikes stay in one area.
